

iSolved | TimeForce

iSolved TimeForce allows you to easily collect, manage and process your time and attendance data - all with the same easy-to-navigate interface as iSolved HCM.

TimeForce also offers a variety of data collection options to fit any workplace environment, including biometric and nonbiometric physical time clocks, iSolved Mobile app and/or employee self-service. Whether your employees are in an office, shop floor, on the go or on a job site, TimeForce has you covered.

TimeForce enables you to proficiently and successfully manage your employee time tracking, scheduling and even job tracking if desired. It replaces any manual time tracking procedures such as paper timesheets or disparate systems that have difficult integrations with your payroll and HR systems. The elegant connection from TimeForce to iSolved HCM keeps everything in one place, ensuring it's easy to use, access and control.

And, adding iSolved TimeForce to your HCM solution helps you improve your bottom line! You can eliminate buddy punching, clerical errors, scheduling problems, and more. Getting started is fast and efficient and the technology is extremely flexible to accommodate your business rules. Permission levels are at your discretion for administration, supervisors, managers and staff. Pay rules, exceptions and differentials are up to you. Reporting is robust and extensive and you can review the valuable information you need whenever and however you need it.

iSolved TimeForce features:

- ✓ easy to use and quick to learn
- ✓ multiple web browser support
- ✓ unlimited employees, pay policies, and shifts
